

Design Process From Sketch App to Abstract + Zeplin

Overall:

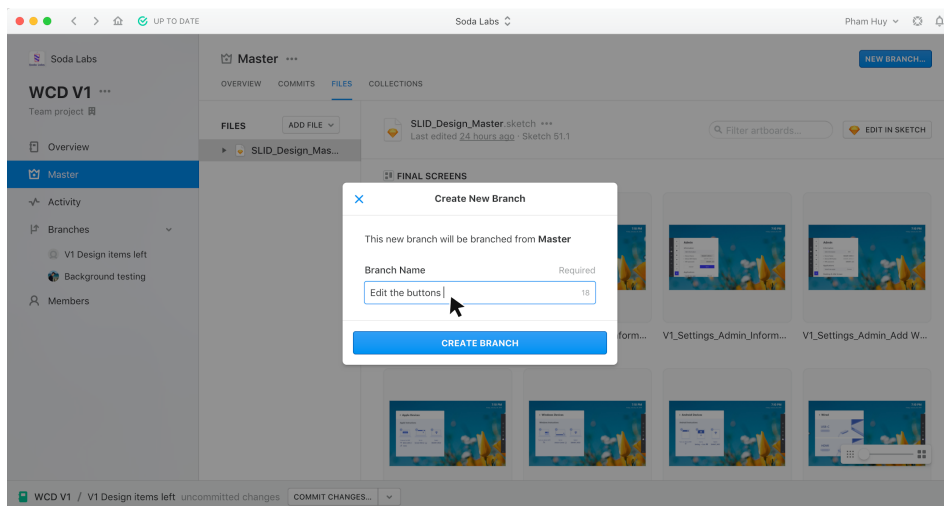

- Sketch App: Designing
- Abstract: Management, Feedback and Review
- Zeplin: Preview and get assets.

#1: Design process from Sketch App to Abstract

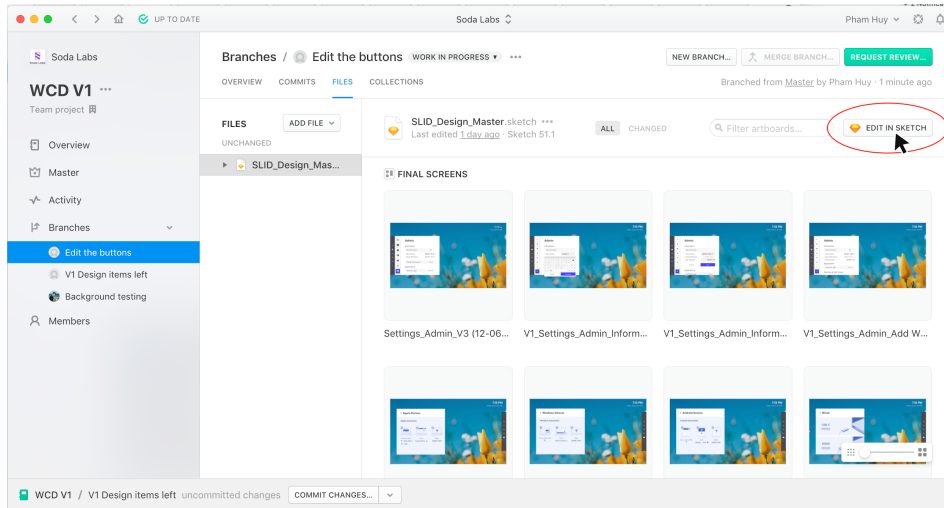

1. In Abstract, create a new branch from master.

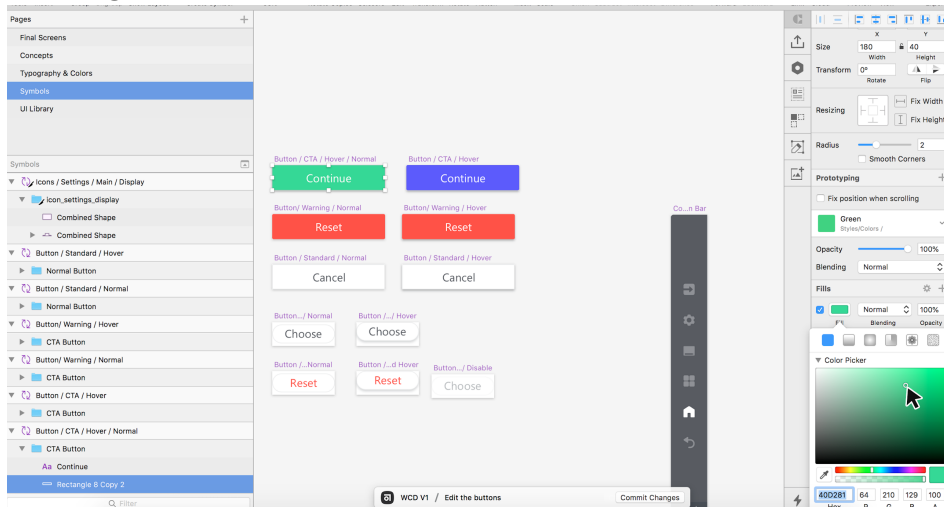

2. Enter the branch name.

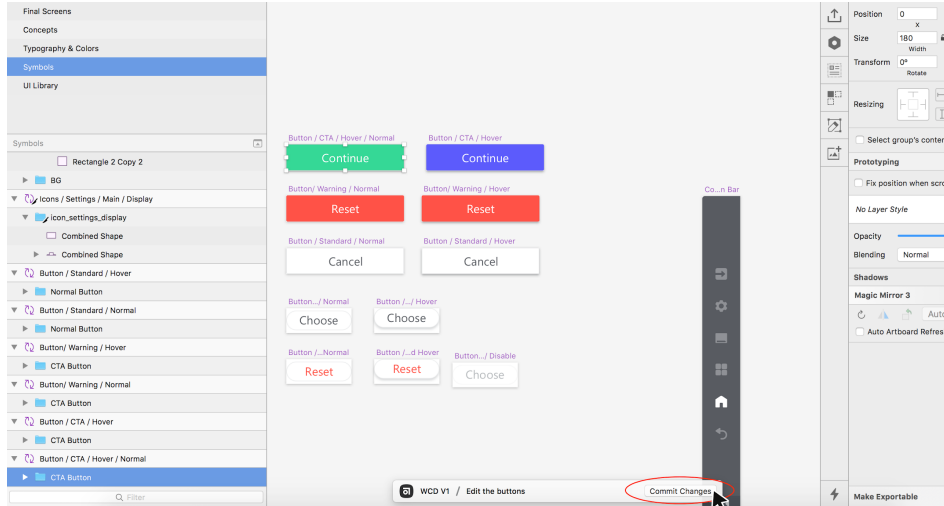

3. Click “Edit in sketch” button

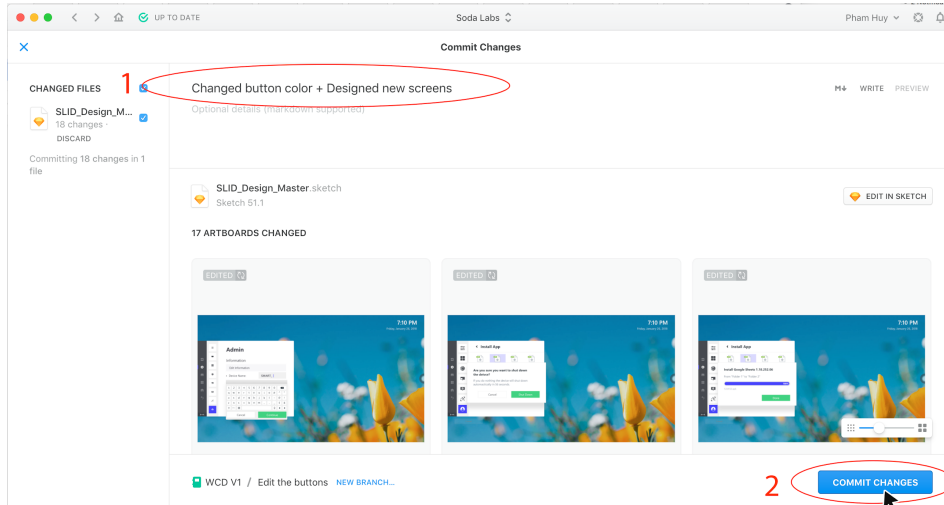

4. Working on the sketch file.

5. Commit changed.

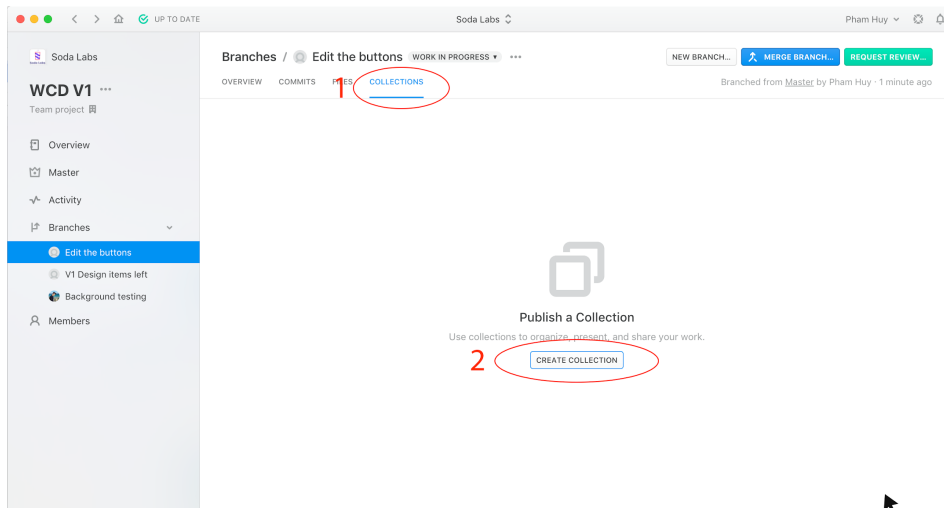

6. Enter the summarize changes then commit.

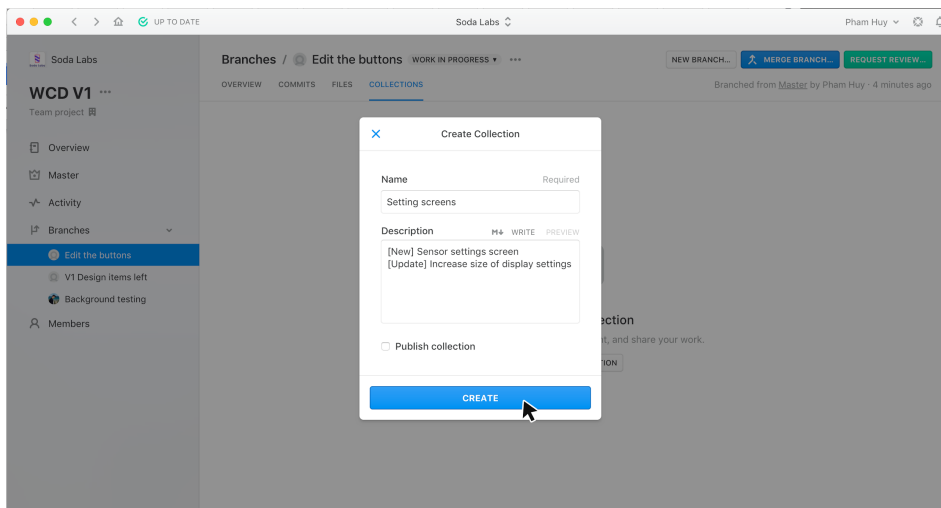

7. Publish and review

7.1 Make a collection that need review

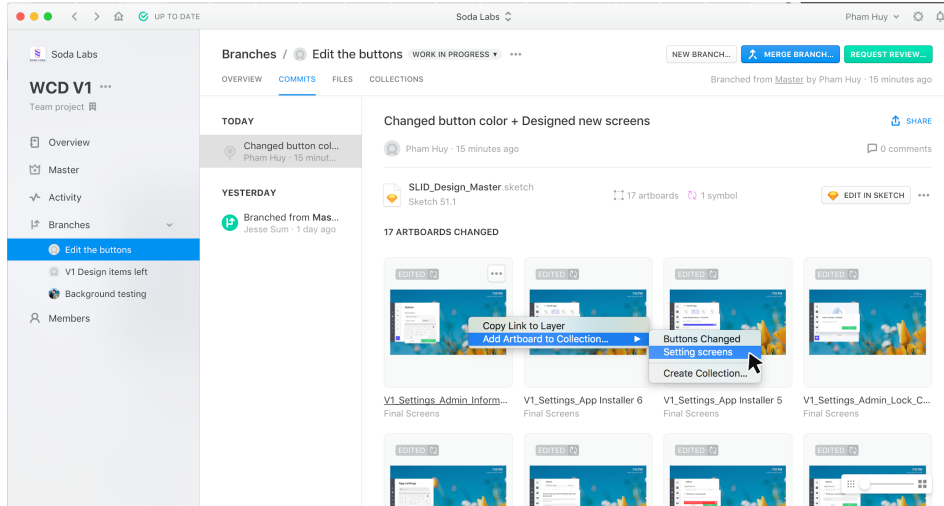

7.2 Enter name of the collection and details changed

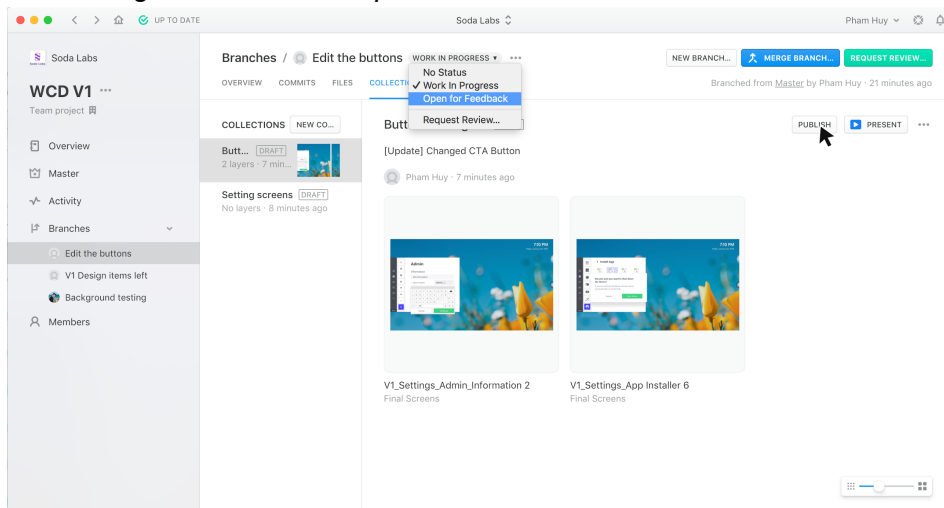

- Use title label for details changed:
 - [New] Design the new screens
 - [Update] Small changes (ex: size, colors, icons, text...)
 - [Redesign] Big changes (ex: layout, user flows...)

7.3 Add screens that changed and need to review to the collections.

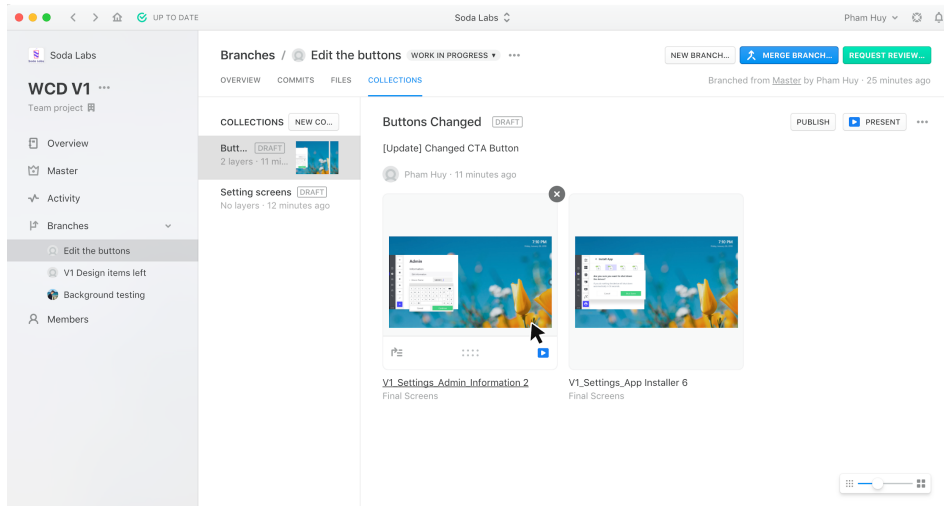

7.4 Change the status then publish.

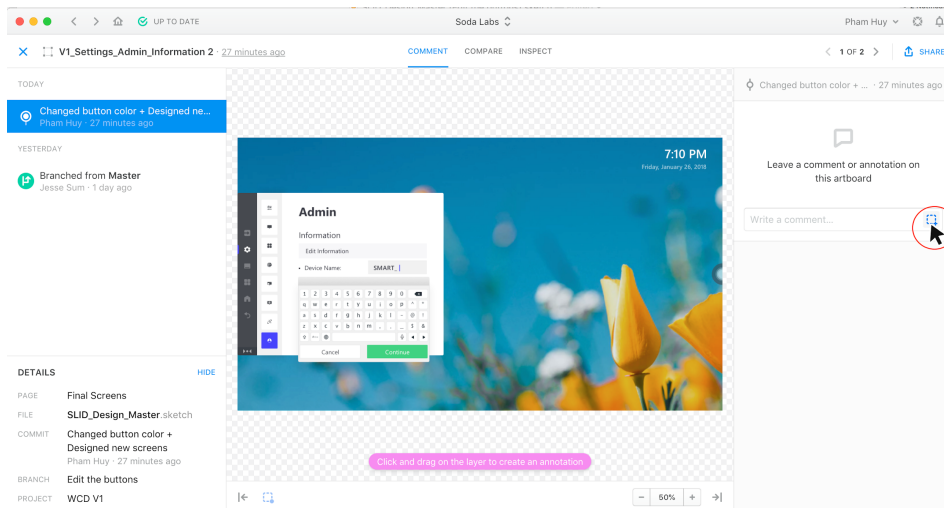

8. Feedback.

8.1 Choose screens from the collections.

8.2 Choose add annotation to feedback on the screen then leave the comments.

9. Review and Merge.

#1-1: Edit from Feedback

1. Open Sketch file from that branch
2. Repeat at step [4]

***Note: Always prepare the backup file.**

#2: Design process from Sketch App to Zeplin

1. **Working on sketch file.**
2. **Organize and export components as well as the assets.**
 - Export Assets from Sketch to Zeplin: <https://blog.zeplin.io/exporting-assets-in-zeplin-50b8b4a56b05>
3. **Upload to Zeplin.**

FAQ:

1. When do we upload to Zeplin?
 - *When those designs got approved, decided to build and developers need to get the assets.*
2. How do we organize Zeplin?
 - *Separate the version by sections on Zeplin.*
3. Which file uploads to Zeplin? Is it always from the master file?
 - *Basically it's from master file since those are the designs that decided to build and get the assets.*
